## KEEP COLD NIGHT BLINDS

The energy costs of a supermarket are an item of considerable importance in its overall expenses. KEEP COLD night blind systems make a decisive contribution to reducing the consumption of energy in a supermarket. Please find below some more details

about our products.

### Hand-operated KEEP COLD blind

Reduce your energy costs by covering your refrigerated multidecks with KEEP COLD night blinds at the close of business, as well as on public holidays and at weekends. The hand-operated blind is operated manually, easy to retrofit and easy to handle. Hand-operated blinds can be used for all refrigerated multidecks.

The hand-operated blinds with integrated brake function from KEEP COLD night blind can be released from any opened position. The spring system then gently and uniformly rolls up your blind completely.

Available in the standard design or as cassette blinds; they can also be easily retrofitted to existing refrigerated multidecks.

### Hand-operated KEEP COLD blind in cassette

KEEP COLD hand-operated blinds in cassette save you real money day after day. The attractive cassettes are available in different colors. The back-to-back installation of the blind cassettes permits easy handling by your personnel. The cassette elements are supplied in two standard lengths, 1250 mm and 1875 mm, with a standard blind pullout length of 1200 mm (other lengths are possible).

The hand-operated blinds with integrated brake function from KEEP COLD night blind can be released from any opened position. The spring system then gently and uniformly rolls up your blind completely.

Available in the standard design or as cassette blinds; they can also be easily retrofitted to existing refrigerated multidecks.

### Automatic KEEP COLD blind

### Keep Cold Contact Informations

The automatic **KEEP COLD** blinds possesses an integrated electric drive which enables the blind to be unrolled and rolled up again without any problem. These blinds can be used with shelf lengths of up to 15 meters with just a single motor. Switching can be carried out manually or via the central supermarket lighting system.

Available in the standard design or as cassette blinds; they can also be easily retrofitted to existing refrigerated multidecks.

#### **KEEP COLD Benefits ;**

##### **EASY TO USE**

**KEEP COLD** night blinds are simple to install, requiring no special expertise. All components are rustproof and washable, and the blinds are designed to retain a clean and shiny appearance for years to come.

##### **BUSINESS AS USUAL**

**KEEP COLD** night blinds won't interfere with store operations or restocking, and customers will appreciate that your store is doing its part to conserve energy.

##### **TESTED AND APPROVED**

**KEEP COLD** night blinds are a proven energy saving resource, and have been tested for use by all major refrigerated display case manufacturers.

##### **LOWER MAINTENANCE COSTS**

Maintenance Costs are reduced, by allowing refrigeration compressors to work less and last longer.

##### **LOWER HEATING COST**

**KEEP COLD** energy-saving blind lowers store heating costs when they are used during winter months, by keeping cold air inside the display case where it belongs, rather than allowing it to spill out into the store.

##### **THE REAL VALUE**

**KEEP COLD** night blind is the value with made from high-quality materials and components, yet priced less than comparable brands. And unlike cheaper plastic blinds which discolor and tear, our fabric is made to last for years, making it the night blind of choice among display case manufacturers.

##### **FAST PAY-BACK ON YOUR INVESTMENT**

Competitively Priced **KEEP COLD** Night Blinds can save up to 40% of your energy costs and pay for itself in less than a year. The savings will depend on local cost of energy, number of hours the store is closed and type of equipment.

##### **LONGER SHELF LIFE**

The shelf life of perishable products will be extended, while product losses due to equipment or power failures will be reduced.
